### SUBMETER COMPLAINT

San Diego County Department of Agriculture, Weights and Measures is responsible for ensuring the accuracy of submetered devices. These devices are used to distribute utilities (electric, gas, and/or water) purchased by the park/establishment or owner/operator from a serving utility through a master meter. The Department also ensures the owner/operator of submetered devices is applying the same method of billing and rates as set by the serving utility, for individual customers.

**In order to evaluate your complaint and to avoid delays, we must have photocopies of THREE of your most recent consecutive utility bills or any billing in question. Please complete the section below:**
